

Submitter: Adam Lujan

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1069

I support this bill as it will benefit both housing providers and renters alike. This will make it easier to receive any notifications from housing providers and their teams for residents and will help increase the work flow of on site property teams. As a member of a team that manages over 300 apartments in one community this would help me to focus more on providing help in the office to my fellow team members and residents alike.
