

Submitter: FRANK SCHIEDLER

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I am a native Oregonian, and I support any bill to control and hopefully eliminate all CAFOs in OR. I recommend that the committee watch the documentary Cowspiracy. It details how animal agriculture contributes 51% of greenhouse gases. We will never improve the environment if we do not reduce the effects of animal agriculture. Cowspiracy also shows the amount of land these operations occupy and the amount of water the animals consume. It is amazing, and heartbreaking!

The FDA has also declared that chicken is just as bad as meat in causing heart disease! Heart disease is the number 1 killer in the US. So eliminating animal agriculture will not only help the environment, it will also help improve the health of this nation. (I have been on a plant-based, whole-food diet for the last 12 +/- years.)
