

Submitter: Richard Manthey

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

As a physician in Portland, I care deeply about this bill. The POSITIVE impact that renewable diesel fuel could have on the health of Oregonians, the Oregon environment, and the Oregon economy can not be understated. Please strongly consider supporting this bill, and seeing the mounds of evidence opposing the concept for what it is----more hot air that the state doesn't need. Thank you RCM MD. Portland Oregon
