

Submitter: Mister Colburn
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

To whom it may concern,

Climate change indoctrination is not fair to the kids of our school system. They experts don't even agree with the differences or if it's "global warming" or cooling.. or "Atmospheric rivers" or whatever.

The fact is this is fake science that is not doing any good to any one. It is a doctrine designed to create doubt in the minds of people who have faith in a greater being, by stating that somehow we can change the environment; not God, or higher power.

If it was true, we would not allow the auto makers to build aluminum engines and parts in Japan, China, and other countries. We allow them to be built for us so we are not the ones producing the pollution. yet we are told by the government that in fact we, the U.S. makes the most pollution. This is crap and you all know it.

The automotive companies have put smog controls on our cars for the better part of fifty years, and apparently it did nothing to help the environment. If those some controls were worth anything, we would not be facing these issues of "climate change" as they were designed to combat "climate change". Humans have no power to control the climate. We cannot stop feet of snow falling in the Serria-Nevada's or stop a hurricane or tornado ! We have no power or control over the weather. That is why insurance claims use the term, "Act of God" in the policies they write to save themselves from paying out claims !

So, stop telling kids the car they ride in, or the bus they came to school in; is killing the environment. This fake science is creating anxiety in these kids and is not healthy for their mental health. Do all of us a favor and teach them what they need that real life business' need in the next generation of work force.

This doctrine is a waste of time and money. This probably won't make a difference since the state will waste money, as they always do.
Save the money and teach STEM and leave the fake science to Al Gore, (The father of all this fake global warming crap.. HE IS NOT A SCIENTIST, yet, he created this crap because he had no talent to do anything else after being the vice president.)
Global warming/climate change = LIBERAL lies.

Just an FYI, CRT is a racist sham and should not be taught in our schools either. People should be "judged by the content of their character, and not the color of their

skin." Martin Luther King JR.

When did this ever change??.... oh when the fake "white privilege" doctrine became a thing... What a joke !

"Loyal to country always. Loyal to government, when it deserves it." Mark Twain

Don't give the citizens of Oregon reasons not to be loyal to the state government or leadership ! Remember, you are to represent us ALL in the state and not your own interests or special interests. Don't be a sell out. Listen to the citizens in the entire state not just your blue corner of the state.

Thank you for your time.

Your humble tax payer
