

Submitter: Ken Frederick

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2796

I fully support responsible use of all-terrain vehicles on highway access routes including county roads.

I've seen a similar law in effect in Montana for a number of years as I visit friends and family there. It is impressive how residents there utilize these vehicles as cost effective tools to supplement their transportation needs while also supporting recreation.

In addition to avoiding used conflict with defined rules, equipment and operating standards, it creates vehicle licensing badging that helps to really identify abuse and misuse.
