

Submitter: Kristi Chapman

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

I am against this bill that will scare children into believing they are doomed from kindergarten. Historically if you look at sea levels, they haven't risen. If so, nobody would insure waterfront properties. Sorry, indoctrinating our children is wrong. Stick to reading, writing, math. Our children are currently failing in all of those subjects when you compare them to other countries and states.
