

Submitter: Keith LaHaie
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

Dear Members of the Senate Committee on Education,

I strongly oppose SB854. While I have no issue with teaching students about the impacts of the naturally changing climate on our communities, this bill goes far beyond that, and is yet another divisive and dangerous indoctrination scheme aimed at the young minds of our students. It links the radical climate alarmist agenda with several other radical leftist ideologies, none of which should be taught in our schools.

Oregon schools are already performing very poorly and are actually a national laughingstock. This bill will do nothing to change that. The focus in our schools should be on basic education, not indoctrination schemes that further leftist ideals.

Please make sure that there still does not make it out of Committee.

Thank you.
