

Submitter: Mark Mintz
On Behalf Of: KCRCC
Committee: Senate Committee On Education
Measure: SB854

I strongly oppose this bill. We're told to "follow the science"; yet the preponderance of the climatologists have been censored and silenced on this long-standing topic. These scientists are all in accord that there is NO evidence to support the Climate Change hoax, which even had to change its original name from "Global Warming" due to lack of sufficient evidence and data to support it. This bill represents nothing but organized propaganda being spewed out in the classroom to our dear children. Do NOT let this bill see the light of day!
