

Submitter: Joseph Brown
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

Climate change, as it is presented these days is incredibly over politicized and NOT rooted in real historical weather data. It's purpose is to scare people, to assist and accelerate the transfer of wealth and accumulation of power to the elite class. The world is NOT on the edge of a climate apocalypse, but it is on the edge of a mental / emotional apocalypse, due to the terror tactics of the climate obsessed. The world has been around for billions of years. It was here before people came and will be here long after people are gone. To think that our presence is that impactful, or for that matter, that our feeble efforts to redeem ourselves would be, is pure narcissistic nonsense. Like everything in government, it is about the power and the money. Quit fooling yourselves, quit lying to us, quit scaring the kids and vote this down.
