

Submitter: Rob Saxton

On Behalf Of:

Committee: House Committee On Education

Measure: HB3198

Nothing is more critical to learning than teaching students to read by the end of third grade. We know how to teach reading in the most effective way, but it takes work and training to ensure all Oregon children are taught that way. Show me third grade reading data in any Oregon school district and I can tell you how they teach reading. High achievement - they are using the science of reading. Poor outcomes - they teach whole language or utilize no model at all. We can fix this! House Bill 3198 gets it done.
