

Submitter: Rebecca Blackall

On Behalf Of:

Committee: House Committee On Education

Measure: HB3198

The reading gap in the US is alarming and only expanding. The science on what works in PK-2 is clear, and yet we aren't funding and implementing it at scale, or strategically with our students who are the most in need. Something has to change if we are going to work towards eliminating illiteracy in our nation and within our state. We must do better.
