

To whom it may concern,

By 2034, there will be more Oregonians over 65 than children under 18. We need to do more to address this permanent change in our demographics, as our systems are not prepared for it. Every action starts with intent, so I support HB 2869-2. Together, we can prepare a framework for a plan to secure a better future for all generations in Oregon.

Thank you,
Cassandra Cornwell
