

Submitter: Brad Fry

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

I am opposed to any teaching of Climate issues in any Oregon School. The science is manipulated and inflated to promote an end to my lifestyle, an end to my ability to transport myself in any means I choose, an end to my ability to heat my home, light my home, and raise my food. This bill will continue to grow snowflake children. This bill will promote putting unlimited funds in the pockets of fools who develop educational materials. It will promote voting for corrupt politicians who will pray on these children and encourage them to vote for the very fools I oppose in our Federal, State and local governments.

Thank you for your time.
