

Submitter: G G

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB854

I oppose this bill. Tiny children do not need to be taught the world is going to end, that their exhale is killing everything, and the carbon in their bodies is no good. Just stop! They are just children that need to learn to read and write, play and have fun. Then when they are curious enough to explore, they can learn about the climate and CO2, on their own! Children need to learn fundamental things, like how to add and subtract! What about teaching them a little about law??? Now that would be practical. OPPOSE this bill!!
