

Submitter: John Oswald
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

SB 854 RE: Climate Education Bill.

I am opposed to this bill. It is not necessary. Our children need to be taught reading, writing and math. They don't need any political propaganda taught to them. The leftist climate change talking points ignore an enormous number of opposing studies and viewpoints of scientists all over the world. The issue is polarizing, unsettled, and instills undue anxiety in our youth.

Please don't waste our children's time with this nonsense.

Respectfully,

John Oswald
