

Submitter: Clinton Bryan

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3248

My family travels to many other states for ohv use and vacation, it would be nice to stay closer to home. Support local business. With proper equipment installed I feel these are not a safety issue on certain roads, I don't think that interstate 4 lane roads are among those. I do however believe these are as safe or safer than many vehicles on certain roadways. They are more likely to avoid an accident due to how controllable these units really are. Please follow the many states and allow us to use these on public roadways that my tax dollars provide for. Thank you.
