

Submitter: Fran Recht

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3382

Oregon is favorably known for its robust public processes and land use laws. This bill totally subverts both. This bill would set a terrible precedent-- powerful lobbyists and associations going around the public process when they can't get their way through legal means (e.g. Jordan Cove). Why ever we would allow corporations, port associations, or others to exempt from the public involvement, land use and state/federal consistency laws that assure needs are balanced and the environment protected? Please do not allow this bill to pass.
