

Submitter: Dan Keeley

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: SB851

Hon. Committee members:

It has always been my experience that bullies must be controlled by their victims banding together. An organization whether it be school, employer or government agency has not a snowballs chance of ending this plague unless those being abused stick together and stand up for themselves. There are already extensive rules about hostile work environments, adding even more rules and liability to the already crushing burden on employers makes no sense at all. To make matters worse this bill requires nothing of victims and leaves agencies and employers open to lawsuits from those who would scam the rules. Please put this bill in the round file where it belongs.
