

Submitter: Dan Keeley

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: SB907

Hon. members of the Committee:

While the intentions of this bill may be honorable, the details are unworkable. Also, there is already a government agency dedicated to this cause, it is called OROSHA and most employers already live in fear of it. Please don't overlay this additional regulation over the OSHA rules. Trying to keep track of governmental rules is already a crushing burden. Muddying the waters by having another separate regulatory authority for the same problems makes everything about the rules much worse. Stiffen OSHA rules if you must but do not duplicate them! Thank you for the opportunity to comment.
