

Submitter: Mary Davies

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

SB85 is totally unnecessary. We currently have laws in place that take care of the cattle feeding situation. We do not have factory farms. Our cattle operations are by highly respected stewards of the land and cattle. This will be a huge burden to the feedlot owners not to mention raise the price of meat . Many families are already suffering the inflation of our food. This will just increase this and make it harder for the public to buy local, Oregon meat to feed their families. Therefore I oppose adding layer after layer of bureaucracy to something that is in place and working for everyone.
