

Submitter: Joel Schauer

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

We need to slow down on this bill. There seems to be no shortage of jobs in this state at this time and we want to bend over backwards and ignore all previous planning that went into the UGB to lure in a bunch of semiconductor factories when our economy is already heavily dependent upon them. Creating all these jobs with no people to fill them and a continued housing shortage will only drive the cost of living in this area higher. Even more to consider is that these companies won't be hiring local people because they don't have the proper skills for these jobs meaning they will be hiring many out of state/out of country people to fill these positions.
