

Submitter: Robert Vorhies

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I strongly oppose SB85 and amendment 1. This bill proposes to hold issuing or renewal of a license or

permit or allow the construction or operations of existing CAFO's or future CAFO's. If these CAFO's are

shut down because their permits are not renewed, how can the impact of CAFO's be studied? The

concluded facts will not show accurate information. Also, who will be responsible for the establishing

the new rules and regulations to be implemented? How will Oregonians prevent regulations not in their

best interest?

I recommend a NO vote on SB85.
