

Submitter: Stevens Sally J

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I treasure kayaking on the beautiful Oregon rivers & lakes. I also enjoy hiking and camping regularly. Factory farms pollute the waterways and they stink! We should not bring more of these monstrosities into existence, let alone into Oregon state. The climate change is destroying ecospheres and impacting wildlife already. This destruction should not be enhanced further with factory farming. We should be encouraging more meatless diets to lower carbon emissions now. The future already appears to threaten extinctions, let's not do anything at all that might hasten this ending. Fighting for wildlife protection, for future generations, and for the quality of our air, water and land, Sally J Stevens
