

Submitter: barbara grover

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3382

The Joint Committee on Transportation should not advance HB 3382. HB 3382 is an extreme, vague, and dangerous bill which would allow powerful Ports to bypass important protections. I do not understand the rationale for this bill and am angry that these ports are seeking to bypass important environmental safeguards that not only protect, fish & wildlife, water quality, but also the communities along the river. This bill is unfair, unwise, and I strongly urge you to oppose, and not advance this bill.
