

Submitter: John Swaner

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3382

The underlying purpose of this bill appears to allow ports to override local and state laws and regulations which prohibit services and land use for activities which endanger Oregon citizens health and livelihood through polluting our natural environment and contributing to greenhouse gases and release of dangerous chemicals. This could seriously set back Oregon's attempts to protect ourselves from the present dangers caused by climate change.
