

Submitter: Maxine Centala  
On Behalf Of:  
Committee: Joint Committee On Transportation  
Measure: HB3382

Thank you for reading these comments.

HB 3382 would undermine Oregon's land use system and cripple our ability to limit federal actions that could harm our coastal and estuarine environments. Also, the bill would enable ports to dredge major rivers without complying with state and local land use regulations.

HB 3382 could do serious harm to Oregon's 50-year tradition of careful land use planning for the sake of one special interest. Please don't pass this bill.
