

Submitter: Jan Zuckerman

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3382

HB 3382 is a very dangerous bill that will give ports and industry the power to undermine our local and state land use authority. It would make it not only impossible for communities to have a voice but would profoundly impact our ability to protect our environment and meet climate and livability goals at a time when our ecosystems are already stressed.

Aren't lawmakers supposed to safeguard our coastal and aquatic habitats?

By supporting HB 3382, we are basically throwing away our statewide land use planning goals, administrative rules, local comprehensive plans, and local zoning regulations.

Everything about HB 3382 is fundamentally wrong and should never be considered in our state.

Please do NOT advance HB 3382
