

Submitter: John Ably

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2555

I am writing in support of HB 2555. Many people like myself get healthcare through their workplace, meaning we don't have a say in which health insurance company we have a plan through. If this bill passes, naturopathic doctors would no longer have to decline to accept certain health insurance plans due to unfair reimbursement. This would effectively increase patient access to health care, especially primary care and preventative services. It is appalling to hear of how large the discrepancy is for reimbursement. If a doctor is licensed to provide a certain level of care, they should be paid fairly for that work. Please vote yes for HB 2555.
