

Submitter: Daniel Dizney
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3213

Dear House members,

I am writing in support of HB 3213. If there ever was an animal rights bill that anyone who cares a whit about animals should be able to get behind I would think this is the one. First, cosmetics unlike diseases and food are not necessities by any stretch of the imagination. Secondly, there are alternative methods for testing cosmetics. To this old man it just seems unconscionable to subject any sentient beings to captivity and discomfort for, in essence, the vanity of human beings.

Thank you for your listen.
