

Submitter: Clair klock

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

Chairs Sollman and Byrum and members of the committee,
I'm Clair Klock from Corbett, retired farmer and conservation specialist that has advocated for retention of farm and forest for the last 50 years. I urge your opposition to SB 4 with particular note to dash 10 and 11. I wholeheartedly support production in the Oregon and US that reverse the loss of jobs to offshore locations. Our part is developing the economy is not destroying farmland - this is elimination of farmland by a 1000 cuts. There is no reason why industrially complexes can't be 4-5 stories or more.

Oregon does not benefit if we destroy farm and forest land for industry.

Let us not become a Los Angeles Basin or what we a witnessing in the Treasure Valley across the Oregon border in Idaho.

Thank you
