

I am writing in support of naturopathic doctor's receiving the same compensation from insurance companies as regular doctors receive. I have seen both, regular doctors, and naturopathic doctors. My very low level of vitamin C, was found by my naturopathic doctor. My cholesterol levels have stayed down as a result of a supplement my naturopathic doctor rec-comended I take. I believe naturopathic doctors deserve the same insurance compensation that regular doctors receive.

Respectively yours, Jary Kelley
