

Submitter: Charles Bronson

On Behalf Of: People with a brain

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2665

You want to set a price on nurse wages? Really? As if it's the nurses wages that are the problem with our healthcare system? Come on, you're smarter than that. You can not possibly look at organizations like Providence, that are posting record profits, year after year, even during the pandemic, without price caps in place on nurses wages..... and say "yep, it's the nurses fault our health care system is so expensive". Use your brain. Stop bowing to corporate donors and lobbyists for these giant companies.

Stand up for your constituents and the working people of Oregon by voting no on this absurd bill.

This is price fixing, plain and simple.

You are choosing to knee cap working class Americans instead of going after the hospital executives.

Be better. Vote NO!
