

Submitter: Alice Shapiro  
On Behalf Of: Portland Raging Grannies Environmental Team  
Committee: Senate Committee On Energy and Environment  
Measure: SB868

We are in favor of the installation of 500,000 new heat pumps that will both heat and cool homes efficiently and affordably. Since this bill will provide financial assistance and other help to purchase and install heat pumps and prioritize low-income households and those at highest risk from extreme weather, we support it also for the climate/human justice aspects of this bill.
