

Submitter: Peter Lent  
On Behalf Of: Retired  
Committee: Senate Committee On Natural Resources  
Measure: SB85

I strongly support SB85. We need to favor the development of small neighborhood farm enterprises. Such a far better for the environment, including climate change. The food produced tends to be better for local consumers as well. Further, these megafarms tend to be harder on livestock and other animals. In general such animals thrive in smaller agricultural units where they receive more attention. The state of Oregon needs to pay far more attention to the treatment of farm animals, especially in mega-farm environments. Thank you.
