

Submitter: Catherine Mushel

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Dear Senators:

Let's keep our soil, water, and air healthy, and thereby keep our people healthy. Factory farms, full of confined animals use more antibiotics, contaminate ground water, and concentrate methane gases. We need to support agriculture that supports the ecosystem and everyone living in it. Please support SB 85.

Reliant on food, clean water, and air to live in Portland, Oregon
