

Submitter: Shawntae Jackson

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2665

As being a health care worker I would like to say working as a caregiver is one of the hardest jobs ever to do and matter fact one of the most underpaid jobs ! I think to say we know are worth and we care for people and take care of family members by capping the wages that are already low would really make it even harder for people to do these particular jobs because of loss of income for their own families! We put ourselves on the front lines of care even through Covid we are still there caring for residents! It would be ashamed to do this to the most hard working clinicians!
