

Submitter: Karen Ashikeh

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB869

I was among the first of my Beaverton HOA to switch to electric only appliances and done a little at a time, this was affordable. Rebates for businesses to update commercial and farm properties would be highly welcomed as I own both commercial and agriculture investments. Schools should be hubs for networks that power neighborhoods as they usually have large lands, power for school, school buses and surrounding homes. Thank you for looking at subsidies for homes, schools and commercial building that can share power with near-by businesses and homes.
