

Submitter: Bill Harris

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB871

Chair and members of the committee: I am an old man who has great desire that my great grandchildren' children will live in a safe world because a series of generations have lowered and then controlled green house gas (GHG) with increasing ecologic justice. I very much favor adoption of SB868, SB869, SB870 and SB872. These bills will make it possible for us to meet our Oregon share of planet green house gas (GHG). The technology is practical and the money is available. Our buildings are the source of 40% of our state total of current release of GHG second only to our transportation GHG. It is clear that we can do our part in lowering GHG. These bills will guide us in making safer, healthier home and work spaces and do it in a manner that gives special support to Oregonians who are struggling to get such spaces. Please pass these four bills to put us on course to success for a safe healthy Oregon. Bill Harris Portland, OR
