

Submitter: Naomi Kaynor

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2002

I strongly support this bill as having good access to gender affirming care is a requirement for the good health of transgender people. The provisions supporting access to women's health to reproductive health would also improve the general health of women in the state. All people have the right to make their own decisions in regards to their health and well being.
