

Submitter: Elizabeth Batterson
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3214

his bill is a mockery to all who have raised animals for 4H, FFA, ranchers, rodeo, and backyard patriots to raise their own food. Stop trying to legislate stupidity. Eastern, southern, and central Oregon make their living off of the very animals this bill is going to be stuffed to ban. This is why these areas want to succeed from the western part of the state. Extreme bills like this one threaten the very livelihoods that FOUNDED this state.

STOP and actually do something responsible for once! Make recalls of government elected positions less complicated. Focus on bills giving PARENTS back the right to govern schools. Focus on forcing monopoly health systems, like St Charles, to RESPECT their patients and families by making them live up their their non-profit mission. Repeal mask and vaccine mandates, and ensure that only LEGISLATURE has the ability to do anything even remotely like the last 3 years again. Focus on finding a way to communicate with the majority of landowners in Oregon who voted Red and who are tired of the mess in Portland, Salem, Eugene, and Bend with homeless, drugs, crime, etc. repeal 110 as it is a monumental failure. Conceded that Measure 114 is Unconstitutional and repeal it in all forms.

We the people are listening and we are Pissed Off. you were elected to represent us, not destroy us.
