

Submitter: Susan Kidd
On Behalf Of: Express Healthcare
Committee: House Committee On Behavioral Health and Health Care
Measure: HB2665

Hello,

I oppose this bill. Healthcare workers need to be recognized for their efforts and risks that they take in the field and need a wage that rightfully supports that. If the wage is capped that threatens staffing needs more intensely, people tend to work for agency's because there is more pay there. If there isn't the pay that they were going for then it isn't worth the risk. They need to be paid more not less! Please consider opposing this bill.
