

Submitter: Molly Kidd
On Behalf Of: Express Healthcare
Committee: House Committee On Behavioral Health and Health Care
Measure: HB2665

I oppose this bill as agency staff work hard for their wage and are in a position where they are desperately needed by the facilities to care for people. If the wage cap was to be enforced it would add further strain to the healthcare field as employees would ultimately have to go out in search of different careers or job change to supplement the cut or set wage.
