Measure: HB3214

I encourage you to actually read this bill and determine the negative impact it would have on the agricultural industry as a whole. It appears that whom ever wrote this bill HB 3214 does not have a full understanding of the cattle industry and the importance of having all breeds available for breeding and cross breeding. The terrain that cattle graze is large and very diverse, demanding different strong characteristics amongst the breeds.

Thank you for taking the time to address this bill and issue.
