Committee: House Committee On Judiciary
Measure: HB2007

Gun free zones do not work.

If the goal of this bill is to protect people from being shot mass murderers, we already know they SEEK OUT gun free zones to conduct their evil and kill innocents. This is because gun free zones provide them with an open killing field with zero resistance. In almost every instance when a mass shooter is confronted with armed resistance, they decide to give up and often attempt to kill themselves before being arrested.

These are objective facts that cannot be ignored anymore. Even though some people may feel safer with this bill, the reality is that they are even in MORE danger.

With the additional restrictions suggested, the need for concealed carriers to have to store their firearms in their car increases. This will absolutely lead to an increase in guns stolen.

Furthermore, concealed carry holders are statistically less like to commit a violent crime than a cop. The only thing this bill does is restrict the rights of law-abiding citizens.

I beg you, stop restricting the rights of law abiding citizens. We aren't your enemy.
