

Submitter: Chandra Warren

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB2665

My name is Chandra Warren and I along with many others are writing to voice our concerns about capping of pay that bill HB 2655 will allow if it passes. As the cost of living is continuing to rise, this will be a drastic mishap if pay is reduced or capped. As many of us are already facing difficulties maintaining our household and living expenses, this change in salary will force us to make changes to our lifestyles because we will not be able to sustain our current living situation. Capping of pay will also lead to high turnover rates. High turnover rates will force the loyal employees who choose to continue to work, to have to work longer hours, and this can lead to stress and other health issues. We are asking that this bill be buried and not passed into existence. This is not the answer
