

Submitter: Michael Ferry
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB2005

I stand opposed to this bill on the grounds of it's creating criminals of law abiding citizens who are collectors of vintage firearms built prior to serial numbers being attached to them. Valuable collections will be instantly marked as a violation of state law and investors or normal collectors of these beautiful works of art will be made felons. Guns which have been handed down through generations will be in jeopardy. As for those who have had the ingenuity to assemble kits created for hunting rifles they fall under the same black list under the mystical definition provided by this unconstitutional bill. I find it very disappointing that those whom we elected to represent us in our state capital continue to show their unworthiness and unwillingness to do the job we chose them for. The voting box continues to be our only choice to be represented properly .
