

Submitter: Kay Graven

On Behalf Of: American Cancer Society Cancer Action Network

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

In 2004 I lost my dad to lung cancer caused by smoking. He was a victim of nicotine addiction and it took his life. By banning flavored tobacco in Oregon we can save lives. Once nicotine is introduced as a stimulant in whatever form, the beginning of a deadly addiction is set in motion. Flavored tobacco is being successfully Marketed to our young people and is an effective gateway to overwhelming addiction and ultimately potential death. We must stop this product now! Please help save lives!
