

Submitter: Robbie Ellis
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3214

Any bill that would limit or prohibit the showing sale or development of animal husbandry is a direct attack on the welfare and wellbeing of animals and farmers. The best cared for animals are those raised by families who are actively involved farmers who show their animals in 4H and Rodeos. Any bill that would limit this is a direct sign of the ignorance of city dwelling individuals that have no clue about farming and only look at the support of corporate farming as a reasonable source of food stuff.

The other sect that supports bills like this are the arrogant, militant vegans who are fine with the slaughter of millions of small rodents, snakes, rabbits, and wildlife in the fields where their food is grown as long as they can sanctimoniously declare others as cruel and inhumane. This bill should be struck down and the farmers should be protected from the ignorance of the government officials who cluelessly support bills of this nature.
