

This bill would hinder vetted law abiding citizens who have jumped through every hoop the state and federal government has set for them to acquire a concealed carry permit from defending themselves in the public spaces that they own and are entitled to exercise their constitutional rights upon. The very places for which the carrying of a concealed firearm has the practical and lawful use of defending one's self from individuals who do not abide by or care about what laws are in place to prevent them from doing harm. This bill is yet another egregiously unconstitutional, shady attempt to disarm and vilify the law-abiding American public and I vehemently oppose it.
