

Submitter: Wayne Osenga  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB2005

After reading HB 2005 as submitted I was realized that every part of this proposed bill has already been contested in the United States Supreme Court when similar and even identical proposals have been put before the Court and on each and every occasion these ideas have been rendered non-enforcable due to violating the 2nd Amendent of the U.S. Constitution. To believe that similar law suits will not be submitted is just arrogance on the parts of Governor Kotek and Attorney General Ellen F. Rosenblum which means that the people of Oregon will have to fund the efforts of the State of Oregon to try to defend this bill through all of the legal processes up to and including those required by the U.S. Supreme Court.

My biggest concern beyond the State spending my money to defend violating the Constitutionally protected rights of myself and all Oregonians is that the proposed changes are submitted under the guise on "gun control" to enhance public safety when in fact not one singe idea in this proposal will do ANYTHING to prevent a single crime from being committed by someone while using a firearm. These radical proposed changes will only accomplish one thing which is to criminalize law abiding citizens and to further subject those law abiding citizens from being able to protect themselves from criminals who by definition will not obey the proposed laws any more than they obey the laws that exist right now, which is more important now than ever before since the introduction of the "defund the police" movement that exists in the largest cities and urban areas in this state right now.

Please, use common sense and applied intelligence and stop trying to criminalize legal gun ownership, rather submit laws which will actually reduce or curb criminal activity.
